

Rt. 12, Frederick, Md. 21701
9/6/75

Dear Both,

The clippings and the scientific literature are helpful. Thanks.

The final retyping of Post Mortem is past the point where the scientific literature can be included but there is plenty of time if you have time and do find more to be of help to Lesar in the appeal.

Skimming it tells me this literature includes what does not duplicate what I have already obtained. I've set up a file for this for Jim to use when he completes the Ray appeal and gets on this one.

We keep going like you in finals. Yesterday, when he had to be ~~near~~ near that court, Jim files another FOIA suit for me. This morning I found a letter I wrote and forgot to mail Robert some time ago. (Enclosed.)

Howard Roffman is here and is working on the appendix to Post Mortem, fresher in mind and hard and I'm certainly effective in the annotations. So, it appears to be confusing, to a degree is, but moves in one direction.

Of the clips I could not avoid the temptation to read The Popkin Papers. I know the insane content. Thanks. I never see the Voice.

I have the Tatler, but don't throw your copy away. I have not been able to get one for Jim and if he can't we may need one. He has been talking for a while about seeking another lawyer to do something about these ripoffs. They declined subsidiary rights and then stole them.

This particular SatEvePost I have, thanks. I do not yet have the Prouty Oct. literary stuff. Probably I'll have a copy sent. I've had the b.s. conclusion read to me by a reporter. My view is the Prouty is the military's answer to the CIA and that Prague, otherwise one of the nicest of people, is on this subject out of control, malacal and hurtful.

I do appreciate this time and trouble. Thanks to you both,

sincerely,
